

AI in the Classroom

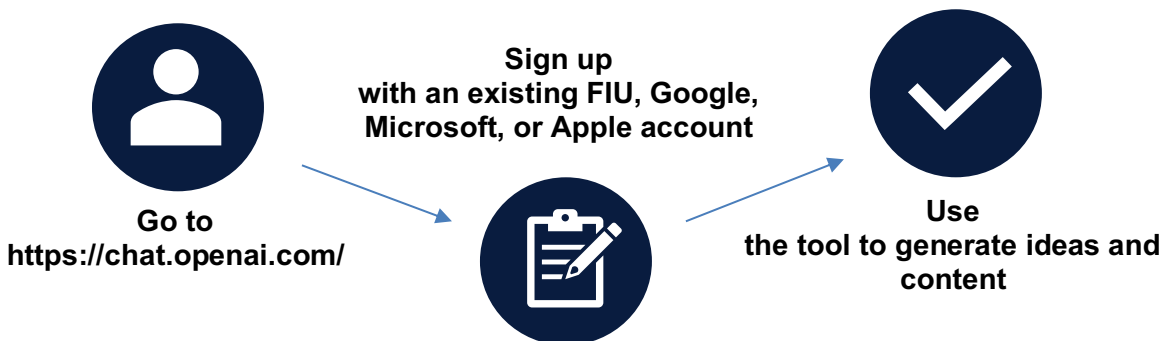

designed by Freepik

Access AI

One of the easiest ways for you and your students to get started with generative AI is to create a free ChatGPT account. At FIU, faculty and students also have free access to Microsoft's Copilot through their FIU email credentials. Both AI chatbots are powered by OpenAI's GPT-4o, one of the most popular large language models in the world.

- Week 4-5: Morphology
 - Basics of Morphology
 - Types of Morphemes: Free and Bound
 - Derivation and Inflection
 - Morphological Typology: Analytic, Synthetic and Polysynthetic Languages

Message ChatGPT

ChatGPT can make mistakes. Check important info.

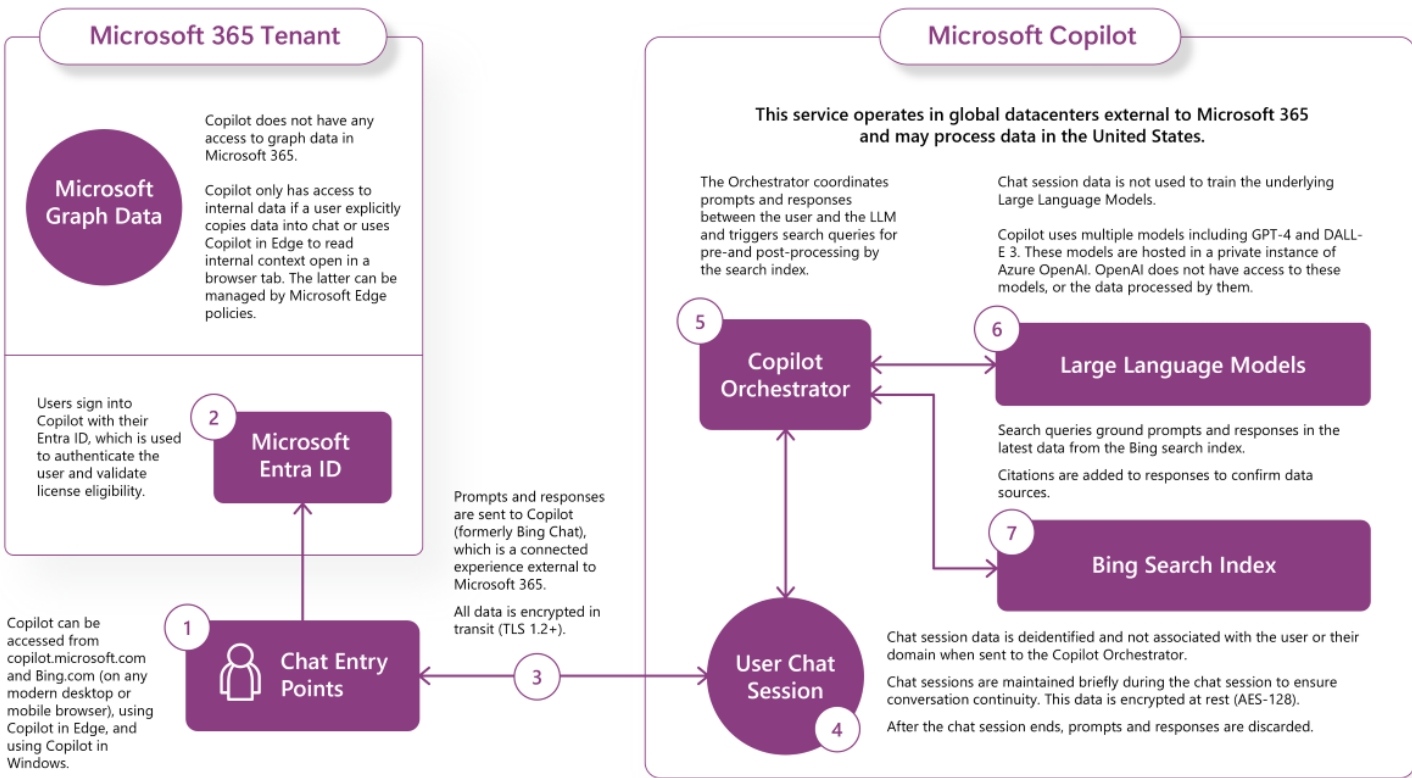

Microsoft Copilot

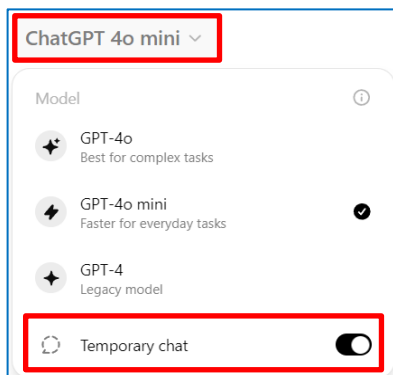

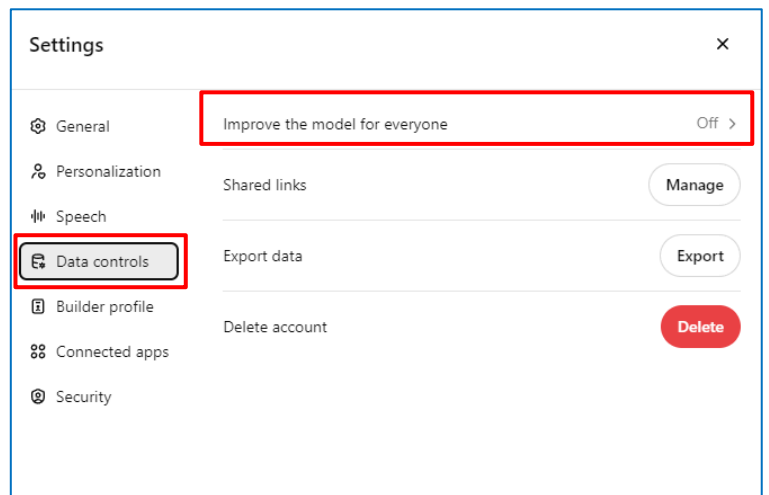

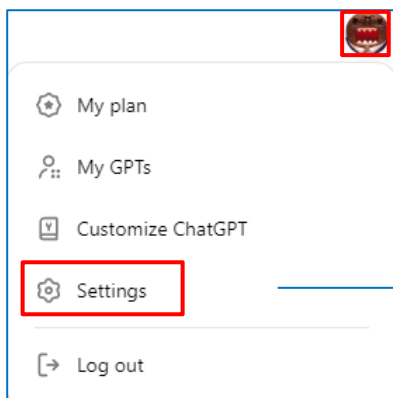

The image shows two screenshots. The left one is the Microsoft Office365 sign-in page, with the 'Log In' button highlighted in yellow. The right one is the Copilot interface, showing the 'Copilot' logo and the text 'Your everyday AI companion'. Below this are three cards with prompts: 'How have world literacy rates changed in the past 30 years?', 'Help me create guidelines for 7th graders on writing a persuasive essay', and 'Create a fun lesson plan on supply and demand for 10th graders'. At the bottom, there are options for conversation style: 'More Creative', 'More Balanced', and 'More Precise', along with a 'New topic' button and a text input field.

Commercial Data Protection (Copilot)

Settings and Temporary Chat (ChatGPT)

- Copilot through FIU does not collect training data and erases session history once the user closes the browser.
- Protecting your data and privacy in ChatGPT requires changing your user settings.
